## Welcome to News and Notes

I hope I don't bore everyone, but I thought I would learn more about the villages that are served by News & Notes and pass it on through this section. The problem with this is that many people in the villages have lived in the area for many decades and know all there is to know about them, but of course they can always help by filling me in on interesting tidbits, to help keep everybody interested. I am a newcomer, having only lived in Britford for 5 years, but St. Peter's Church is amazing, as are the others in the 5 villages and the why's and wherefores of The Navigation have intrigued me, so I will start with Britford and get round to the other villages in time!

Firstly the village of Britford was first named in a Saxon charter of circa 670, where it appears as *Brytfordingea*. It also appears as Bretford and *Bredford* in the Domesday Book of 1086, as well as *Brideford* in the Curia Regis Rolls of 1203. The name means 'brides' ford', I wonder why? Did there have to be a ford for the river and a ferry as well for the brides of the area to be transported to St Peter's Church without getting their feet or their gowns wet? Any information will be warmly welcomed.

In 1664 an Act of Parliament authorised the conversion of the River Avon into a navigable channel between Salisbury and the English Channel at Christchurch, part of which runs through Salisbury and which is referred to as 'The Navigation' in Britford. Canalised channels were dug to straighten sections of the river, including one about a 1 mile long (in old money) through Britford parish. The river was no longer navigable by 1737, but bridges over it and remains of locks still survive. This was all connected with the woollen industry that had developed in the Salisbury area and the necessity for the transport of wool and woollen cloth out of the area. Our low lying fields around Lower Road, Britford, were regularly flooded to produce richer grass and a better quality of grass for the sheep and Salisbury wool and cloth was highly prized. It is truly a privilege to live here! *Enid Alston*

# Community News & Events

## Community Speed Watch Report

It is now nearly three years since Nigel Start set up the local Community Speed Watch group. Following training by the Wiltshire Police and using one of their speed cameras we have held regular sessions every three weeks for the first 2 years at agreed safe locations on the road through our villages. I have now taken over from Nigel as the team co-ordinator and we continue to hold irregular sessions in Odstock and Nunton.

During the past 2 months we have held 12 sessions in which time we have "clocked" over 1600 vehicles, the majority travelling within or at least close to the speed limit. However, we did "catch" 48 vehicles speeding. These drivers have been reported to Wiltshire Police for further action.

Our aim is to discourage speeding through our villages and thereby make the road safer for all road users. We are encouraged by the support we receive when on duty and also when we observe how often drivers slow down abruptly when they see us. We are pleased to note that we recognise very few of the "offenders" as members of our community. We do get the occasional complaint from an unhappy driver but are actually encouraged by their words and gestures as this implies that our presence causes them the inconvenience of having to slow down!

The team is a group of 10 local residents, sessions usually involve three volunteers and last 45mins either in the early morning or late afternoon when traffic is heaviest. Most volunteers complete 3 or 4 sessions a month on days that suit themselves. It is not an arduous commitment, but we would welcome additional volunteers to swell our numbers. If you would be interested in joining us, please contact me. Sherwood Elcock, tel. 01722 334398: e-mail: [sherwood@nunton.org.uk](mailto:sherwood@nunton.org.uk)

## Longford Estate

Spring is always an exciting time on any Estate and Longford Estate is no different. Every element of the business is busy be that:

- Preparing for tours of the castle
- Gardens being managed and improved for the family and visitors to the castle to enjoy
- Repairing and renovating properties for both existing and new tenants in agricultural, commercial and residential properties
- Producing fry and growing fish on the fish farms or processing whole fish for the supermarkets
- Cows calving
- Winter crops being nurtured and spring crops being planted
- Woods being cleared of brush to allow the next generation of trees to survive
- Trees being harvested

The castle continues its open days linked with the National Gallery, the tour groups are given a brief history of the house before being guided around a number of rooms with the opportunity to see numerous paintings including some by some of the masters including Van Dyck, Claude and Gainsborough as well as seeing oriental porcelain, Brussels tapestries, and exceptional 18th-century English and continental furniture. The tours finish with the opportunity for guests to enjoy the formal gardens.

The maintenance team plus a number of regular sub-contractors continue to transform houses from tired properties into bright new places for our tenants to live. The ever changing legislation means that we are continually having to review what we are doing and ensure that we meet not only new legislation but also the expectations of new tenants and maintain the high standards we aspire to and our current tenants expect.

Our fish farms have hatched about five million eggs to produce fry and then grow these young fish on for up to 13 months to produce beautiful rainbow trout for a number of supermarkets and wholesale markets. We have recently refurbished four ponds and installed an air uplift system to increase growth rates of our fry whilst maintaining high levels of welfare which is critically important to us as an Estate and producer but also to you the consumer. Planning permission was granted earlier this month for further investment on our Barford site, where we hope to utilise Danish ideas and technology as the world leaders in trout production to further improve our facilities for both the fish and our staff, reduce water usage and bring our production methods into the 21<sup>st</sup> century.

Our Aberdeen Angus suckler herd is nearly at the end of calving for another year, over a 12 week period we hope to have just over 200 live healthy calves. Some of the heifers (females) will ultimately join our breeding herd at the age of two and be mothers of the future, whilst others including all the steers (males) will go for meat.

Our winter cropped fields in the main look well, our oil seed rape like many other farms did not fare so well this year and we lost over a third of the crop due to high levels of a pest called Cabbage Stem Flea Beetle – whilst it has always been a problem we have had a seed treatment (a neonicotinoid) removed by legislation from our armoury. The seed treatment has successfully controlled the beetle in the past to enable the crop to thrive and has allowed farmers to grow a good break crop, I suspect that less oil seed rape will be grown across the country going forward and certainly here on the Estate next year's area will be lower – our big conundrum is what do we grow instead. Spring crops were all established in good conditions and are growing well. Early spring work was complicated through illness in the arable team which meant we had to reorganise our normal routine of who did what jobs, and whilst the team did an excellent job it reminded us all that our farming workforce is much smaller than it was and we now have a huge reliance on the skills and ability of specific individuals to do particular tasks.

Our woods team are on routine maintenance of our woods and copses, clearing brush and bramble from in amongst new plantations to enable young trees to thrive and to produce quality timber in years to come. At the same time we have our timber contractors thinning more mature areas of woodland by taking out larger trees and again allowing the smaller trees to thrive, this timber is used for a variety of uses including construction, firewood and horse bedding.

There is always something happening somewhere on the Estate, the team that work here are truly the lifeblood of the place ensuring that we as the current custodians do our utmost to care for and improve where we live and work.

## Salisbury Cathedral Organ Restoration Project

The restoration of Salisbury Cathedral's magnificent Father Willis organ is underway and will take 14 months. The work is being carried out by Harrison and Harrison, renowned organ restorers from Durham who have cared for the Cathedral's organ since 1978. It was 50 years ago that the organ last underwent such a comprehensive restoration. Some of the pipes will be cleaned on site, with the remainder taken away for cleaning. The mechanics, bellows and reservoir will be repaired.

The leader of the team Ian Bruce, has 30 years' experience working with pipe organs commented, "Salisbury Cathedral's Father Willis is one of our flagship organs,, and is top of the tree musically, due to the high-quality workmanship." The organ was built in 1877 at a cost of £3,500, a sum given by Miss Chafyn Grove of Zeals. It has just under 4,000 pipes, ranging in size from ones as small as a matchstick to others that stand 32ft high.

The project will cost about £700,000. The Friends of Salisbury Cathedral has given a substantial grant towards the restoration project and the Cathedral received a grant of £82,300 from the Heritage Lottery Fund for the restoration and the organ exhibition, *pulling out the Stops*, which is in the north transept and runs until November.

If you would like to make a donation towards the restoration of the organ, please make cheques payable to Salisbury Cathedral and send to Jilly Wright, development manager at Wyndham House, 65 The Close, Salisbury SP1 2EN. Donations can also be made online at [www.salisburycathedral.org.uk/get-involved/donate-now/donate](http://www.salisburycathedral.org.uk/get-involved/donate-now/donate).

## Secret Gardens of the Close: Sunday 9<sup>th</sup> June; 1pm to 5pm.

The Friends of Salisbury Cathedral invite you to join them for their *Secret Gardens of the Close* event at their open gardens. This event enables the Friends to make additional grants to the Cathedral and the money raised last year will sponsor a pinnacle on the north-east corner of the Cathedral. Eleven gardens in Salisbury Cathedral Close will be open and tea and homemade cakes will be served in the garden of South Canonry. Proceeds from the teas will also go to the Sudan Medical Link. There will also be an exhibition of botanical art by Salisbury Florilegium Society in the Medieval Hall, artist Cliff Topping will be sketching in a number of the gardens. A recorder group 'Close Consort' will be playing. There will be stalls on Choristers' Green, including the Friends' plant stall.

Entry £10, children under 16 free. The donation includes an entry programme and admission to all featured gardens. It is payable on the day from the Friends' gazebo on Choristers' Green. For more information contact the Friends at 33a The Close, Salisbury, SP1 2EJ, telephone 01722 335161 or email [friends@salcath.co.uk](mailto:friends@salcath.co.uk).

Garden visitors are advised to use city centre car parks, as parking in the Close is for disabled badge holders only and a charge is payable.
